

2016 CATALOG

Products for the coating of wood

for you

The technology, quality
and performance of professional
coating products for wood,
in your home.

EXTERIORS

COATINGS

P. 10

Water-based coatings for exteriors protect the wood against bad weather and UV rays. Available in various colors, they can easily be applied to: wooden frames, shutters, fences, balconies and other wooden items located outdoors, beams and attics.

INTERIORS

COATINGS

P. 18

Water-based coatings for interiors protect the wood against scratches and staining and can be washed with neutral detergents in an aqueous solution. They can be applied to wooden furniture and items for interior use (chairs, doors, tables, kitchen cabinet doors, baseboards/skirting, etc.).

PRODUCTS FOR **WOODEN FLOORING**

P. 22

Water-based coatings for wooden flooring are easy to apply and give the surface long-term protection against wear-and-tear. Maintenance products protect wooden floors and create a dust-proof, anti-static surface.

 **PARKEA**

PRODUCTS FOR **MAINTENANCE**

P. 26

Products for cleaning and maintenance make it possible to preserve intact over the long term the beauty of wood located outdoors. They can easily be applied to wooden frames, shutters, fences, balconies, garden furniture and decking.

ICADECK WATER-BASED OIL FOR DECKING AND GARDEN FURNITURE
EXCELLENT PROTECTION OUTDOORS

Interior and exterior use

Ready to use

Brush or spray application

Cleaning of equipment with water

Coverage 12-16 m²/L per coat

Final drying 24 hours

ICADECK WATER-BASED OIL FOR DECKING AND GARDEN FURNITURE
 Minimal environmental impact. Easy to apply by brush, it protects the wood against bad weather and UV rays, giving an even coloration. Particularly suitable for exotic wood species (e.g. Teak and Iroko).

INTENDED USES

Wooden decking, flooring, garden furniture and other wooden items located outdoors, beams and attics.

USAGE ON NEW WOOD

- The wood must be clean and dry, and free from dust, oils and products that may limit adhesion.
- Sand with 150/180-grain sandpaper.
- Mix the product thoroughly and apply using a brush (with synthetic bristles), wiping with a cloth if necessary.

- After 1, maximum 2 hours, apply the second coat of product. Then sand with 280/320-grain sandpaper before applying the second coat of product.

USAGE ON PRE-COATED WOOD

- Sand with 100/120-grain sandpaper until the complete removal of the pre-existing coating.
- Complete the sanding with 150/180-grain sandpaper.
- Remove the sawdust.
- Mix the product thoroughly and apply using a brush (with synthetic bristles), wiping with a cloth if necessary.
- Proceed as stated above in relation to usage on new wood.
- On wood previously treated with the same product, which has not yet degraded, clean the surface, sand lightly with 180-grain sandpaper, remove the sawdust and proceed with the application of the product.
