

WOOD COATINGS

CONTRACT COATING SOLUTIONS

Contract furnishing is a service for the production of furniture and interior design solutions [sometimes customized] for hotels, bars, restaurants, offices and, more generally, all public premises.

The watchword for this sector is **creativity**, which takes its place alongside the **focus on the external environmental** in which the structure to be furnished is located, the type of activity carried out there, etc.

Customized solutions to make your ideas true

Over the years, ICA Group has specialized in the creation of customized products to match the individual client's specific requirements, making its contribution from as far back as the design stage into the wooden furnishing and flooring of prestigious hotels, chain stores, theatres, etc.

Thanks to the experience it has built up over the years, ICA Group is a partner that has what it takes to provide effective advice on the **best product solution**, to come up with all-new effects and on-trend colors, and to respond to the client's **customization** requirements for both the indoor and the outdoor.

Fire-retardants coatings

ICA Group has created a specific range of coatings called **Prometea Fire-retardant**, which can also be used in contract sector, as and when required.

The range includes transparent, white or pigmented coating cycles, with fire resistance certificates to meet all needs. These cycles combine **physical and chemical performance** with excellent finishing.

Low levels of environmental impact

Coatings which are free from heavy metals and are ideal for bio-construction projects:

- _Water-based coatings for external wooden structures and frames and decking
- _Water-based coatings for interior decoration and wooden floors
- _“Bio” water-based coatings for internal and external furnishings
- _UV-cured coatings for interior decoration and wooden floors
- _High-solid-content coatings for interior decoration and wooden floors
- _“Special effect” water-based coatings for interior decoration

Design-oriented

Today it is possible to render the “color” aspect of the product/object [or furnishing system] even more attractive and up-to-the-minute.

ICA Group invests heavily in research into new colors and effects with a view to fulfilling as effectively as possible the requirements of **designers** and **architects**, who need to have access to innovative, high-performance solutions that are aligned with the latest trends.

Only strictly **tested** and fully **certified** products

In line with its policy of maximum respect for the environment and maximum quality, all of ICA Group products undergo the most stringent of **tests**:

_ **ARBOREA SUN** project on the duration of water-based coating cycles for exteriors [natural weathering in Florida and accelerated natural weathering, referred to as the Q-TRAC Natural Sunlight Concentrator, in Arizona]

_ **Chemical/physical resistance** of the coated surface on the basis of the international standards of reference

_ Compliance of water-based products with regulations on **indoor emissions**

_ Safety of contact between the coated surface and **food products** and products for personal use

_ **Fire reaction** of fire-retardant coatings [European Standard UNI EN 13501, Italian Standard UNI 9796, British Standard]

_ Coatings for the marine sector, **RINA** certified in accordance with the **MED** Directive 96/98/CE

_ Products that contribute to the award of credits [from 1 to 3] for the **LEED** building certification

ICA Group: specialists in the manufacture, marketing and distribution of special coatings for wood.

This major industrial group is based in Civitanova Marche [in the central-Italian province of Macerata] and has 3 manufacturing facilities in Italy [2 in Civitanova and 1 in Romano D'Ezzelino, in the province of Vicenza], covering a total of 47,000 m² and extending across a total site area of more than 130,000 m². The group also has an active presence overseas, where it directly controls 6 foreign companies, which give it a direct presence in Spain, Germany, Poland, China, India and Canada.

For decades, the group has been working to serve its client base through the manufacture of a range of high-quality, highly reliable coatings – cutting-edge solutions that have what it takes to meet the ever-changing requirements of the market and the essential obligation to safeguard the environment.

ICA Group: the strength of a major group

ICA Group products are distributed in Italy through 70 direct agents, who tap into a wealth of industry experience. Thanks to this accumulated knowledge, ICA Group's agents understand the coatings sector inside out and have a highly developed sense of what businesses in the sector actually require, thus enabling them to provide those clients with products and services that are always fully aligned with their needs. The group's Italian sales network encompasses branches, depots and specialist resellers.

ICA Group distributes its products in 50 overseas markets through a plethora of branches, depots, distributors and specialist resellers.

A consolidated network to support your projects wherever they may be
