surface finish testing

**Problems with
accredited tests
are history!**

Performance Lab is an UNI CEI EN ISO/IEC 17025:2018 accredited test laboratory

LAB N° 1762 L

Performance Lab is our accredited laboratory for chemical-physical tests aimed at assessing and certifying coated surfaces. Not only: besides the tests, we offer a personalized consulting service to help you achieve your desired quality standards.

Our method

**Assessment of the
need/problem**

**Analysis
and comparison tests**

**Solution proposal
and verification**

UNI CEI EN ISO/IEC 17025:2018 accreditation. What does this involve?

This means that we can issue accredited test reports for the tests we perform on coated surfaces and that, compared to an unaccredited laboratory, Performance Lab guarantees:

IMPARTIALITY
TIMELINESS
EXPERTISE
CONFIDENTIALITY
RELIABLE RESULTS

What type of test can you request from us?

We can conduct tests for **hardness**, **abrasion** and **chemical resistance**. We also perform highly complex tests such as those that measure **resistance to corrosion** or **resistance to light, etc.** Did you know that there are only three accredited laboratories in Italy for these tests and Performance Lab is one of them?

On what materials?

Wood

Glass

PVC

Aluminium

Metal

For which sectors?

Furnishings and decor

Door & window frames

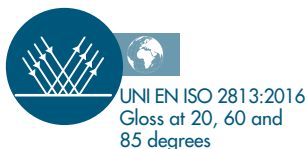

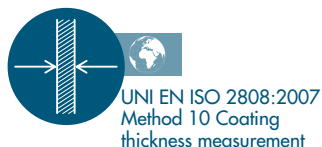

Flooring

Which tests are accredited?

The accreditation process requested several years and the formation of a **team of experts** dedicated exclusively to the Performance Lab.

Among the over 60 tests we perform regularly, we have chosen to accredit the most important ones. The list below includes a selection of them; the process is constantly evolving and each year further accredited tests are added. For the full list visit the website www.performancelab.tech.

The accreditation of our laboratory nonetheless assures you get the same method and safety for all chemical-physical tests we conduct, including those that are not accredited.

Why request accredited tests?

Because they solve future problems today.

- They make you save money because they help you to understand whether the product you want to launch complies with the regulations.
- They allow you to comply with all mandatory regulations to access new markets.
- They boost your company's reputation because they help you to gain value thanks to defined quality standards.
- The test report issued with the tests enables you to take part in public tenders and meet precise technical specifications.
- If your product doesn't qualify after testing, we will help you to understand how to reach the desired standard.
- Tested products will help you to defend yourself against claims and complaints.
